## Who we Are

Dunk & Associates was established in 2000. We are a 100% Canadian, private and professional company specializing in health and safety.

We assist companies in achieving success in reducing their frequency in injury and severity by lending our expertise, training, technology, and excellent customer support.

As prevention specialists, we serve more than 2000 workplaces across Canada in all business sectors (health care, manufacturing, retail, construction, industry, food services, hotels, and restaurants). As a national provider, we strive to empower employers to meet provincial and national standards while maintaining their competitive edge.

## Contractor Safety 24-7

*Do your current safety programs ensure that every reasonable precaution is taken to protect the safety of workers, including contractors and sub-contractors?*

Contractor Safety 24-7 is one of the many programs we offer which make compliance simple for your company. Contractor Safety 24-7 is an online program for hiring firms which enables you to manage, monitor and ensure that all contractors and suppliers to your company are compliant to your Provincial Health & Safety Legislation, Regulations and Standards. This program gives peace of mind to companies by ensuring that all employees working on projects, buildings, and workplaces are competent in health and safety, thus minimizing the risk of injury and mitigating your company's liability.

The program provides 24-7 access to the documentation of compliance between the Hiring Firm, Contractors and Subcontractors, the ability to add, record, and correct safety violations, validate submitted documentation, and document training. Custom designed questions, based on the specific hazards of the job or project, ensure that those performing the work are competent to do so.

## The Benefits of Contractor Safety 24-7

- 1 Reduction in paper waste making your program virtually paperless!
- 2 Program information is provided at a minimum grade six (6) comprehension level making Contractor Safety easy to understand, even for those with limited English.
- 3 Reduction in injury frequency and severity.
- 4 Reduction in safety violations.
- 5 Ensures employer due diligence and accountability.
- 6 Helps make the contractor hiring and bidding process easy.
- 7 Cost saving as less internal resources are required to manage contractor safety.
- 8 Deflects costs of the program to the contractor, not the employer.

## Features

- Web-based assessments used by your company to help ensure contractors are working safely on your worksite.
- Both generic and customized assessments are available.
- Ability to create, share and pass assessments.
- Automated email notifications when assessments are assigned, passed, shared and finished, when violation reports are created, updated or closed or when assessments are passed, failed or expired.
- File assessment validations to help in tracking certificates and proof of insurance.
- Document and assessment tracking.
- Creation, submission and tracking of violation reports.
- Toll-Free help line for technical assistance and support.
