Who we Are

Dunk & Associates was established in 2000. We are a 100% Canadian, private and professional company specializing in health and safety.

We assist companies in achieving success in reducing their frequency in injury and severity by lending our expertise, training, technology, and excellent customer support.

As prevention specialists, we serve more than 2000 workplaces across Canada in all business sectors (health care, manufacturing, retail, construction, industry, food services, hotels, and restaurants). As a national provider, we strive to empower employers to meet provincial and national standards while maintaining their competitive edge.

Environmental 24-7

Is your company doing everything possible to reduce and control waste production in order to protect the environment?

Environmental 24-7 makes going green easy! Whether your firm is searching for alternative “greener” options, or looking for environmental tools and solutions, Environmental 24-7 will do the work for you.

The program will provide you with access to the required policies, forms, procedures, training and tools to assist your workplace in protecting our environment. This is an online solution that is affordable, and in most cases costs saving, through recycling and waste reduction. Learn what simple steps can reduce HVAC costs, energy consumption and create a more relaxed and healthier workplace.

The Benefits of Environmental 24-7

- 1 Reduction in paper waste making your program virtually paperless!
- 2 Reduction in time lost from classroom training. Employees can complete training at home or on their own time.
- 3 Program information is provided at a minimum grade six (6) comprehension level making Environmental easy to understand, even for those with limited English.
- 4 Easy management of online and offline training.
- 5 Ensures employer due diligence.
- 6 Consistency in training across the organization, especially for new hire orientations and training renewals.
- 7 Cost saving as less internal resources are required to manage health and safety programming.

Features

- Web-based delivery of your training program available from any internet speed.
- Environmental 24-7 is available in both English and French.
- Training profiled specifically to each user based on department and position.
- Administrative access to view online training reports.
- Hosting of your organization's policies, forms and procedures.
- Upload of non-web-based training records, such as Battery Disposal to keep all training records in one central location.
- Toll-Free help line for technical assistance and support.
- Hosting of resources
