## Who we Are

Dunk & Associates was established in 2000. We are a 100% Canadian, private and professional company specializing in health and safety.

We assist companies in achieving success in reducing their frequency in injury and severity by lending our expertise, training, technology, and excellent customer support.

As prevention specialists, we serve more than 2000 workplaces across Canada in all business sectors (health care, manufacturing, retail, construction, industry, food services, hotels, and restaurants). As a national provider, we strive to empower employers to meet provincial and national standards while maintaining their competitive edge.

## Safety 24-7

*Do your current programs ensure that every reasonable precaution is taken to protect the safety of workers?*

Systems 24-7 makes compliance easy. Safety 24-7 is an Occupational Health & Safety (OHS) Management Program that offers employers an outsourced system for managing safety. Our online safety program is designed specifically for small and medium sized businesses in any business sector (health care, food services, manufacturing, retail, etc.). When a business is too small to have an in-house Safety Department, but too big to ignore the requirements of the law, Health & Safety 24-7 provides the solution.

Policies, procedures, forms, and E-learning are all tracked and available from one website. In addition, many of our Health & Safety 24-7 users have seen significant reductions to their injury incidents and severity in the workplace! Health & Safety has never been so easy and affordable.

SYSTEMS 24-7  
**Safety**

## The Benefits of Safety 24-7

- 1 Reduction in paper waste making your program virtually paperless!
- 2 Reduction in time lost from classroom training. Employees can complete training at home or on their own time.
- 3 Training and program information is provided at a minimum grade six (6) comprehension level making Safety easy to understand, even for those with limited English.
- 4 Easy management of online and offline training.
- 5 Proven reduction in injury frequency and severity and a faster return to work.
- 6 Ensures employer due diligence.
- 7 Consistency in training across the organization, especially for new hire orientations, non-routine work, and training renewals.
- 8 Cost saving as less internal resources are required to manage health and safety programming.

## Features
